Arduino Robotics (Technology in Action)

John-David Warren, Josh Adams, Harald Molle

Arduino Robotics (Technology in Action) John-David Warren, Josh Adams, Harald Molle

This book will show you how to use your Arduino to control a variety of different robots, while providing step-by-step instructions on the entire robot building process. You'll learn Arduino basics as well as the characteristics of different types of motors used in robotics. You also discover controller methods and failsafe methods, and learn how to apply them to your project. The book starts with basic robots and moves into more complex projects, including a GPS-enabled robot, a robotic lawn mower, a fighting bot, and even a DIY Segway-clone.

- Introduction to the Arduino and other components needed for robotics
- Learn how to build motor controllers
- Build bots from simple line-following and bump-sensor bots to more complex robots that can mow your lawn, do battle, or even take you for a ride

Please note: the print version of this title is black & white; the eBook is full color.

From reader reviews:

James Lindberg:

What do you concerning book? It is not important together with you? Or just adding material when you require something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Every individual has many questions above. They should answer that question due to the fact just their can do this. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need that Arduino Robotics (Technology in Action) to read.

Latoya Brown:

Your reading 6th sense will not betray you actually, why because this Arduino Robotics (Technology in Action) e-book written by well-known writer we are excited for well how to make book which might be understand by anyone who have read the book. Written throughout good manner for you, leaking every ideas and writing skill only for eliminate your personal hunger then you still hesitation Arduino Robotics (Technology in Action) as good book not only by the cover but also by content. This is one e-book that can break don't evaluate book by its deal with, so do you still needing one more sixth sense to pick that!? Oh come on your reading through sixth sense already alerted you so why you have to listening to yet another sixth sense.

Tia Sargent:

In this period globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. The particular book that recommended for you is Arduino Robotics (Technology in Action) this book consist a lot of the information on the condition of this world now. That book was represented just how can the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The actual writer made some exploration when he makes this book. That is why this book suitable all of you.

Walter Pyle:

A lot of guide has printed but it is unique. You can get it by net on social media. You can choose the best book for you, science, comic, novel, or whatever by means of searching from it. It is known as of book Arduino Robotics (Technology in Action). You'll be able to your knowledge by it. Without leaving the printed book, it might add your knowledge and make an individual happier to read. It is most important that, you must aware about reserve. It can bring you from one place to other place.
