The Biodynamic Farm: Agriculture in Service of the Earth and Humanity Herbert Koepf

Bankrupt farmers, erosion of topsoil, and poor food quality owing to pesticides, hormones, and other additives?these are the well-known realities of the modern crisis in farming. This problem is the outcome of the limited vision of conventional methods and a system that focuses exclusively on quick results and profits. The need for changes is clear, and Koepf provides a vast array of research data and results, as well as many helpful details on animal feeding, crop rotation, diseases, pests, and fertilizing. He shows that the biodynamic method of farming and gardening is the alternative that can turn farming around.

Biodynamics is “the oldest alternative agricultural movement in the world.” It is based on the concept of the whole farm as a single organism. Its goals are to protect and nurture the soil, improve the quality of food, and organically integrate the farm into the environment as a whole.

This is an essential reference for all farmers who are unsatisfied with conventional methods and for gardeners who wish to improve the quality of life around them as well as the food they serve their families.

Robert Victor:

As a pupil exactly feel bored to be able to reading. If their teacher requested them to go to the library as well as to make summary for some guide, they are complained. Just minor students that has reading's spirit or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this *The Biodynamic Farm: Agriculture in Service of the Earth and Humanity* can make you sense more interested to read.
