The Value of Human Life: Contemporary Perspectives in Jewish Medical Ethics

The Value of Human Life: Contemporary Perspectives in Jewish Medical Ethics

Just how valuable is human life? The scientist has one opinion; the physician another; the patient probably an entirely separate view. But as Torah Jews, this is a question of paramount importance-and the critical importance of answering it is more pressing than ever. As medicine and science advance to new heights, Jewish medical ethics surge to the fore with new urgency.

At the first International Conference on Jewish Medical Ethics in Switzerland in 2008, leading experts in the field gathered to discuss this vital subject, giving a Torah perspective on a pressing contemporary issue with vast ramifications. This book is a compilation of some of the fascinating lectures delivered at this conference, bringing some of the most prominent experts in the field and their insights.

Included are the words of Professor Abraham S. Abraham, Rabbi J. David Bleich, Rabbi Dr. Mordechai Halperin, Prof. Avraham Steinberg, and Rabbi Dr. Akiva Tatz, who share their thoughts on such critical topics as pre-implantation genetic diagnosis, stem cell research, organ transplants, brain death, palliative care, and triage in Jewish law. The breadth and depth of this book make it a must-read, not only for health professionals, but for every Jew who seeks to be informed on cutting-edge issues of life and death.

(All products will be sent by economy post from Zurich, Switzerland. According to Swiss Post delivery to the USA will take between 11 and 15 working days. In case you require priority delivery please order your preferred item directly from booksnbagels.com)
