## **Cost Planning of PFI and PPP Building Projects** Abdelhalim Boussabaine

This topical and timely book presents an innovative approach to dealing with the complexities of cost planning in PFI.

PFI/PPP projects have a significantly different costing environment from conventionally procured projects, requiring cost analysts to use their expertise and innovative thinking to develop whole-life cost solutions that deliver value for money to the client, thus improving public building assets performance.

Abdelhalim Boussabaine provides a thorough grounding in the theory of PFI, from its early evolution through to examples of current projects. In particular, the rationale for private financing of public services, arguments for and against PFI and 'value for money' mechanisms are discussed. The book presents an innovative framework for whole-life value and calls for changes in the way whole life cycle value is perceived, created and exchanged.

*Cost Planning of PFI and PPP Building Projects* provides the reader with existing knowledge as well as present innovative thinking for future development and management of PFI/PPP cost planning processes. Given the importance and novelty of this book, academics, professionals, undergraduate and postgraduate students will find this book valuable.
