Before September 11, security meant smart cards, passwords, PIN codes, firewalls, Public Key Infrastructure Initiatives (PKI) and Symmetric Key Infrastructure (SKI). But after this tragedy, the focus has shifted to managing e-governance with a lot more emphasis on authentication and verification. Read this book for ideas on implementing e-governance and for designing systems of e-auctions and e-procurement. It is of particular use to students, business and institutional managers, information owners, service providers, system and applications designers, project executors, professionals, bureaucrats, administrators, and all those involved in implementing e-governance.
