This book returns critical theory to its roots in both psychology and the social sciences. It shows some of the relationships between equality in a political and social sense and personal identity that either relates well to such equality, or rebels against it. All this reflects processes of social and cultural influence that involve not only random change but also processes of social and cultural evolution that themselves have effects regarding potentials for self-fulfillment and even public morality. This book provides a framework to help one study the interaction between individual aspirations and social opportunities.

Jerome Braun, known for his writings in interdisciplinary social science, an approach he calls pragmatic critical theory, here provides a book that discusses issues relevant to the moral underpinnings of democratic society, including issues of social evolution and of culture and personality.

This book will be of particular interest to scholars and students of Psychology (particularly in the areas of Psychology of Personality and Cultural Psychology), Sociology (especially those interested in Sociology of Alienation and Sociology of Culture, as well as Sociology of Mental Health), Anthropology (particularly in the area of Psychological Anthropology), Cultural Studies, and Social Theory in general.
