## Restriction Endonucleases (Nucleic Acids and Molecular Biology)

Restriction enzymes are highly specific nucleases which occur ubiquitously among prokaryotic organisms, where they serve to protect bacterial cells against foreign DNA. Many different types of restriction enzymes are known, among them multi-subunit enzymes which depend on ATP or GTP hydrolysis for target site location. The best known representatives, the orthodox type II restriction endonucleases, are homodimers which recognize palindromic sequences, 4 to 8 base pairs in length, and cleave the DNA within or immediately adjacent to the recognition site. In addition to their important biological role (up to 10 % of the genomes of prokaryotic organisms code for restriction/modification systems!), they are among the most important enzymes used for the analysis and recombination of DNA. In addition, they are model systems for the study of protein-nucleic acids interactions and, because of their ubiquitous occurrence, also for the understanding of the mechanisms of evolution.

### From reader reviews:

#### **Amanda Chatham:**

The book Restriction Endonucleases (Nucleic Acids and Molecular Biology) give you a sense of feeling enjoy for your spare time. You may use to make your capable more increase. Book can being your best friend when you getting strain or having big problem with your subject. If you can make examining a book Restriction Endonucleases (Nucleic Acids and Molecular Biology) to get your habit, you can get considerably more advantages, like add your current capable, increase your knowledge about many or all subjects. You are able to know everything if you like open and read a publication Restriction Endonucleases (Nucleic Acids and Molecular Biology). Kinds of book are a lot of. It means that, science reserve or encyclopedia or others. So , how do you think about this reserve?

#### **Lorri Nicholson:**

The ability that you get from Restriction Endonucleases (Nucleic Acids and Molecular Biology) is the more deep you excavating the information that hide into the words the more you get serious about reading it. It does not mean that this book is hard to know but Restriction Endonucleases (Nucleic Acids and Molecular Biology) giving you joy feeling of reading. The author conveys their point in particular way that can be understood by means of anyone who read the item because the author of this publication is well-known enough. This book also makes your current vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having this kind of Restriction Endonucleases (Nucleic Acids and Molecular Biology) instantly.

#### **Tony Hogan:**

Spent a free time to be fun activity to perform! A lot of people spent their free time with their family, or all their friends. Usually they performing activity like watching television, gonna beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? Might be reading a book is usually option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of e-book that you should read. If you want to test look for book, may be the publication untitled Restriction Endonucleases (Nucleic Acids and Molecular Biology) can be very good book to read. May be it might be best activity to you.

#### **Grace Smith:**

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is prepared or printed or outlined from each source in which filled update of news. With this modern era like today, many ways to get information are available for you. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just trying to find the Restriction Endonucleases (Nucleic Acids and Molecular Biology) when you needed it?
