Cities Full of Symbols: A Theory of Urban Space and Culture (AUP - Leiden University Press)

From Jakarta to Leiden, from Buenos Aires to New York, architecture provides much more than shelter—it provides considerable cultural, political, and philosophical meaning as well. With *Cities Full of Symbols*, Peter J. M. Nas brings together internationally renowned sociologists, social geographers, and historians to debate the role of architectural symbols in the urban landscape. Looking specifically at 9/11 memorial designs, the design of the city of Cape Town as a remnant of Dutch colonialism, and the image of the ship washed ashore by a tsunami in Banda Aceh, this volume will be of interest to scholars of architecture, urban design, and policymaking.
