The Hippocrates Health Institute has been the preeminent leader in the field of natural and complementary health care and education since 1956. Their philosophy is founded on the belief that a pure enzyme-rich diet, complemented by positive thinking and non-invasive therapies, is an essential element on the path to optimum health. Hippocrates Institute director Dr. Brian Clement shows how the Hippocrates LifeForce Program implements the use of raw living foods to help people stimulate natural immune defenses against cancer, heart disease, and other chronic diseases as well as maintain a healthy weight. This book is the result of many years of research in the field of human health, and includes case studies describing the experiences of people who have successfully healed themselves after conventional Western medicine had given them little of no hope for recovery.
