Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series)

Ying Kuen Cheung

As clinicians begin to realize the important role of dose-finding in the drug development process, there is an increasing openness to "novel" methods proposed in the past two decades. In particular, the Continual Reassessment Method (CRM) and its variations have drawn much attention in the medical community, though it has yet to become a commonplace tool. To overcome the status quo in phase I clinical trials, statisticians must be able to design trials using the CRM in a timely and reproducible manner.

A self-contained theoretical framework of the CRM for researchers and graduate students who set out to learn and do research in the CRM and dose-finding methods in general, **Dose Finding by the Continual Reassessment Method** features:

- Real clinical trial examples that illustrate the methods and techniques throughout the book
- Detailed calibration techniques that enable biostatisticians to design a CRM in timely manner
- Limitations of the CRM are outlined to aid in correct use of method

This book supplies practical, efficient dose-finding methods based on cutting edge statistical research. More than just a cookbook, it provides full, unified coverage of the CRM in addition to step-by-step guidelines to automation and parameterization of the methods used on a regular basis. A detailed exposition of the calibration of the CRM for applied statisticians working with dose-finding in phase I trials, the book focuses on the R package 'dferm' for the CRM and its major variants.

The author recognizes clinicians' skepticism of model-based designs, and addresses their concerns that the time, professional, and computational resources necessary for accurate model-based designs can be major bottlenecks to the widespread use of appropriate dose-finding methods in phase I practice. The theoretically- and empirically-based methods in **Dose Finding by the Continual Reassessment Method** will lessen the statistician's burden and encourage the continuing development and implementation of model-based dose-finding methods.

From reader reviews:

Kyle Coffman:

This Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) usually are reliable for you who want to become a successful person, why. The main reason of this Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) can be one of the great books you must have is definitely giving you more than just simple examining food but feed you with information that maybe will shock your earlier knowledge. This book will be handy, you can bring it everywhere you go and whenever your conditions throughout the e-book and printed kinds. Beside that this Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) forcing you to have an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we know it useful in your day pastime. So , let's have it appreciate reading.

Hubert Ray:

The book Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) will bring someone to the new experience of reading the book. The author style to describe the idea is very unique. If you try to find new book to see, this book very suited to you. The book Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) is much recommended to you to learn. You can also get the e-book from your official web site, so you can easier to read the book.

Thomas Ellis:

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get lots of stress from both day to day life and work. So , whenever we ask do people have free time, we will say absolutely of course. People is human not really a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to an individual of course your answer may unlimited right. Then do you ever try this one, reading guides. It can be your alternative inside spending your spare time, the particular book you have read is actually Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series).

William Looney:

Your reading sixth sense will not betray a person, why because this Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) e-book written by well-known writer whose to say well how to make book which might be understand by anyone who have read the book. Written inside good manner for you, still dripping wet every ideas and producing skill only for eliminate your own hunger then you still hesitation Dose Finding by the Continual Reassessment Method (Chapman & Hall/CRC Biostatistics Series) as good book not only by the cover but also through the content. This is one guide that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick this particular!? Oh come on your reading sixth sense already alerted you so why you have to listening to an

additional sixth sense.
