**Nano-Glass Ceramics: Processing, Properties and Applications (Micro and Nano Technologies)** Vahak Marghussian

*Nano-Glass Ceramics: Processing, Properties and Applications* provides comprehensive coverage of synthesis and processing methods, properties and applications of the most important types of nano-glass ceramics, from a unique material science perspective. Emphasis is placed on the experimental and practical aspects of the subject while covering the theoretical and practical aspects and presenting, numerous examples and details of experimental methods. In the discussing the many varied applications of nano-glass ceramics, consideration is given to both, the fields of applications in which the materials are firmly established and the fields where great promise exists for their future exploitation. The methods of investigation adopted by researchers in the various stages of synthesis, nucleation, processing and characterization of glass ceramics are discussed with a focus on the more novel methods and the state of the art in developing nanostructured glass ceramics.

- Comprehensive coverage of nanostructured glass ceramics with a materials science approach. The first book of this kind
- Applications-oriented approach, covering current and future applications in numerous fields such as Biomedicine and Electronics
- Explains the correlations between synthesis parameters, properties and applications guiding R&D researchers and engineers to choose the right material and increase cost-effectiveness

### **From reader reviews:**

#### **Brian Alexander:**

The book Nano-Glass Ceramics: Processing, Properties and Applications (Micro and Nano Technologies) can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book Nano-Glass Ceramics: Processing, Properties and Applications (Micro and Nano Technologies)? A few of you have a different opinion about reserve. But one aim that will book can give many details for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or facts that you take for that, you are able to give for each other; you may share all of these. Book Nano-Glass Ceramics: Processing, Properties and Applications (Micro and Nano Technologies) has simple shape however, you know: it has great and big function for you. You can look the enormous world by open and read a book. So it is very wonderful.

#### **Annette Carroll:**

What do you regarding book? It is not important with you? Or just adding material if you want something to explain what you problem? How about your time? Or are you busy man or woman? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everybody has many questions above. They should answer that question due to the fact just their can do in which. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need this specific Nano-Glass Ceramics: Processing, Properties and Applications (Micro and Nano Technologies) to read.

#### **Christine Hughes:**

Now a day people that Living in the era everywhere everything reachable by talk with the internet and the resources in it can be true or not require people to be aware of each info they get. How individuals to be smart in receiving any information nowadays? Of course the answer is reading a book. Reading a book can help individuals out of this uncertainty Information specifically this Nano-Glass Ceramics: Processing, Properties and Applications (Micro and Nano Technologies) book as this book offers you rich information and knowledge. Of course the details in this book hundred % guarantees there is no doubt in it everbody knows.

#### **Nancy Page:**

The book with title Nano-Glass Ceramics: Processing, Properties and Applications (Micro and Nano Technologies) contains a lot of information that you can discover it. You can get a lot of profit after read this book. This book exist new expertise the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to understand how the improvement of the world. This book will bring you inside new era of the glowbal growth. You can read the e-book in your smart phone, so you can read it anywhere you want.
