## Speech Recognition in Adverse Conditions: Explorations in Behaviour and Neuroscience (Special Issues of Language and Cognitive Processes)

Speech recognition in ‘adverse conditions’ has been a familiar area of research in computer science, engineering, and hearing sciences for several decades. In contrast, most psycholinguistic theories of speech recognition are built upon evidence gathered from tasks performed by healthy listeners on carefully recorded speech, in a quiet environment, and under conditions of undivided attention.

Building upon the momentum initiated by the Psycholinguistic Approaches to Speech Recognition in Adverse Conditions workshop held in Bristol, UK, in 2010, the aim of this volume is to promote a multi-disciplinary, yet unified approach to the perceptual, cognitive, and neuro-physiological mechanisms underpinning the recognition of degraded speech, variable speech, speech experienced under cognitive load, and speech experienced by theoretically relevant populations.

This collection opens with a review of the literature and a formal classification of adverse conditions. The research articles then highlight those adverse conditions with the greatest potential for constraining theory, showing that some speech phenomena often believed to be immutable can be affected by noise, surface variations, or attentional set in ways that will force researchers to rethink their theory. This volume is essential for those interested in speech recognition outside laboratory constraints.

### **From reader reviews:**

#### **Nancy Hedrick:**

Have you spare time for the day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their spare time to take a wander, shopping, or went to typically the Mall. How about open or perhaps read a book titled Speech Recognition in Adverse Conditions: Explorations in Behaviour and Neuroscience (Special Issues of Language and Cognitive Processes)? Maybe it is to get best activity for you. You recognize beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have additional opinion?

#### **Morris Whitfield:**

Book is to be different for each and every grade. Book for children till adult are different content. To be sure that book is very important normally. The book Speech Recognition in Adverse Conditions: Explorations in Behaviour and Neuroscience (Special Issues of Language and Cognitive Processes) was making you to know about other understanding and of course you can take more information. It is quite advantages for you. The e-book Speech Recognition in Adverse Conditions: Explorations in Behaviour and Neuroscience (Special Issues of Language and Cognitive Processes) is not only giving you far more new information but also to be your friend when you experience bored. You can spend your personal spend time to read your publication. Try to make relationship with the book Speech Recognition in Adverse Conditions: Explorations in Behaviour and Neuroscience (Special Issues of Language and Cognitive Processes). You never feel lose out for everything in the event you read some books.

#### **James Cooper:**

The reason? Because this Speech Recognition in Adverse Conditions: Explorations in Behaviour and Neuroscience (Special Issues of Language and Cognitive Processes) is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will shock you with the secret this inside. Reading this book next to it was fantastic author who have write the book in such amazing way makes the content inside of easier to understand, entertaining way but still convey the meaning totally. So , it is good for you for not hesitating having this any more or you going to regret it. This unique book will give you a lot of rewards than the other book have such as help improving your ability and your critical thinking way. So , still want to hold off having that book? If I were being you I will go to the publication store hurriedly.

#### **Douglas Quintanar:**

As we know that book is vital thing to add our expertise for everything. By a publication we can know everything we really wish for. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This publication Speech Recognition in Adverse Conditions: Explorations in Behaviour and Neuroscience (Special Issues of Language and Cognitive Processes) was filled regarding

science. Spend your extra time to add your knowledge about your scientific research competence. Some people has several feel when they reading any book. If you know how big benefit from a book, you can truly feel enjoy to read a publication. In the modern era like right now, many ways to get book which you wanted.
