**Case Studies for Ethics in Academic Research in the Social Sciences** Leisa Reinecke Flynn, Ronald E. Goldsmith

This book provides a basis for class discussion about the responsible conduct of social science research. These 16 brief research ethics cases describe situations in which ethical dilemmas arise and present the student with the opportunity to think through the different implications for researchers. The cases emphasize different types of ethical dilemmas involving faculty, students, participants, and stakeholders. Students can discuss what happened, why it was or was not unethical, and what should be the consequences for the actors. Included are the original cases complete with learning objectives, teaching notes, and questions for discussion.
