Representations of $*$ -Algebras, Locally Compact Groups, and Banach $*$ -Algebraic Bundles, Volume 1: Basic Representation Theory of Groups and Algebras

This is an all-encompassing and exhaustive exposition of the theory of infinite-dimensional Unitary Representations of Locally Compact Groups and its generalization to representations of Banach algebras. The presentation is detailed, accessible, and self-contained (except for some elementary knowledge in algebra, topology, and abstract measure theory). In the later chapters the reader is brought to the frontiers of present-day knowledge in the area of Mackey normal subgroup analysis and its generalization to the context of Banach $*$ -Algebraic Bundles.
